INVESTING IN PATIENTS

GIVING BACK TO
THE COMMUNITY

David Crumpton, DDS

*Advanced
Family and
Cosmetic
Dentistry that
Benefits You!*

BY TAMMY ADAMS

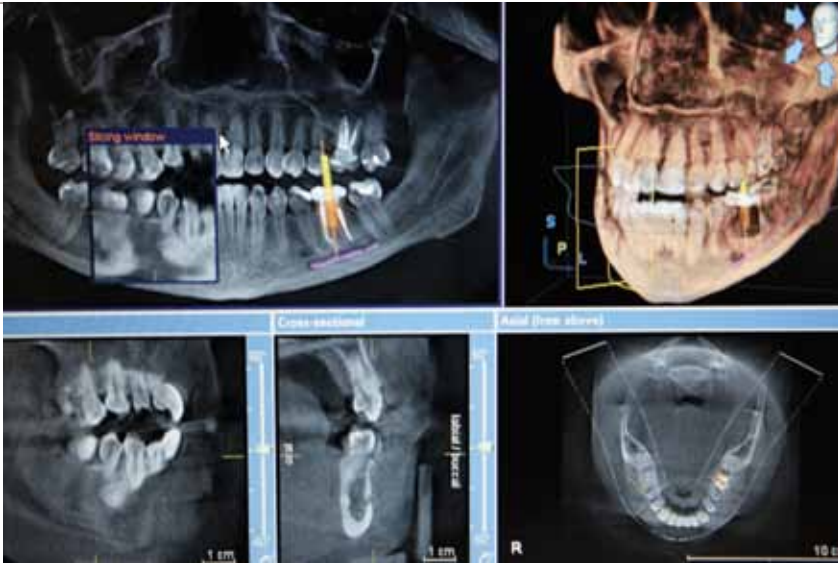

David Crumpton, DDS has long been a leader in high-quality, state-of-the-art dentistry in the Dallas-Fort Worth area. His well-regarded practice offers general, restorative and cosmetic dentistry services for the entire family. For over 16 years, patients have come from across the Dallas-Fort Worth Metroplex and beyond for gentle, thorough, expert dental care.

TECHNOLOGY WITH A PURPOSE

Dentistry is a field that has rapidly evolved in the last decade. New technologies and innovative ways to address dental concerns less invasively are always on the horizon. Dr. Crumpton embraces this technological surge in his field and is committed to continuing education in restorative and cosmetic dentistry. When considering technology, he invests in what provides the most benefit for the patient. The idea is that it should not cost patients more, but benefit them more.

One of the newest advancements for the patients include the Galileos 3-D dental imaging system, which combines the highest resolution 3-D scans of the dental structures with the highest level in patient safety. By using this ultra low-dose technology, Dr. Crumpton can quickly and accurately detect all anatomic structures in real 3-D perspective making treatment highly accurate. It even sees enough of the head to diagnose TMJ problems!

Developed in Germany in conjunction with Siemens Medical, this product is the most studied and researched method available for dentistry. Galileos 3-D Imaging removes “best guess dentistry” and provides the most accurate method for planning an implant or any complete dental procedure, including pre-existing root canals.

EDUCATION EQUALS EMPOWERMENT

Education is so important to Dr. Crumpton and his entire staff. “Our philosophy is that an educated patient is a better patient,” he said. “If we do a good job of educating our patients, they will make great decisions about their own health.”

At the initial personal consultation, Dr. Crumpton discusses with the patient what they would like to change about his or her smile or teeth as well as diagnoses anything that is needed for the patient to achieve a healthy mouth. “We then help prioritize the patient’s needs to develop a treatment plan that works for them,” he explained.

A member of Dr. Crumpton’s experienced team will research financing options and provide a detailed treatment plan. “We focus on precisely what a patient will require to achieve and maintain a healthy mouth and teeth,” said Dr. Crumpton. “We never, ever, try to convince a patient to do any treatment that they do not want nor need to have done.”

This year, Dr. Crumpton has focused on giving back to the community in terms of education as well. Dr. Crumpton was so excited to be able to give two generous scholarships to local graduating high school seniors who plan to pursue careers in the medical field. “We’ve seen firsthand how important it has been in our lives and we wanted to be able to have a bigger positive impact in our local communities.”

EARNING PATIENTS FOR A LIFETIME

It is this honest, practical, empowering approach that has patients returning year after year, referring family and friends along the way.

Patient convenience and comfort are also important keys to the ongoing success of Dr. Crumpton’s practice. They offer pre-operation sedation for fearful patients and each state-of-the-art operatory is decked out with body-contouring dental chairs, movie glasses with a choice of more than 600 movies and even blankets. The staff is as warm and friendly as it is experienced and professional.

A graduate of Baylor College of Dentistry, Dr. Crumpton is a member of the Academy of General Dentistry, the Texas Dental Association and the American Dental Association. His office is located in the beautiful old country club building on Trophy Club golf course, offering a relaxing environment.
